## EXPERIENCE

### OpenText

Intern – UI Automation

Mar 2024 - Present

- Developed and maintained automated test scripts using Python and Selenium to ensure the quality and performance of the product.
- Executed and analysed automated test cases, reporting and tracking issues on JIRA.
- Collaborated with development team to enhance test coverage and improve test case efficiency.
- Utilized Git and GitLab for version control, managing code repositories.
- Contributed to the documentation and standardization of automation processes, improving the overall workflow and knowledge sharing within the team.

## PROJECTS

### NextJot | CRUD App

Dec 2023

NextJot combines the efficiency of Next.js, the flexibility of MongoDB, the aesthetics of Tailwind CSS, and the real-time communication capabilities of Twilio to deliver a robust and user-friendly experience for managing and tracking database changes.

- Tech Stack:
  - Built with **Next.js**, **Tailwind CSS**, and **MongoDB**.
  - **Twilio** integration for real-time SMS notifications on database changes.
- Functionality:
  - Implements CRUD operations for seamless data management.
- User Experience:
  - Responsive design using Tailwind CSS for a modern and user-friendly interface.
- Real-Time Communication:
  - Twilio sends SMS notifications instantly upon any database modification.

### NewsWave | News App

Mar 2023

NewsWave is a news application developed with Next.js, seamlessly integrated with the NewsAPI. This app efficiently fetches news categorized by topic, providing users with a tailored news experience.

- Tech Stack:
  - Built with Next.js for a responsive and fast user experience.
  - Integrated with NewsAPI for comprehensive news coverage.
- Features:
  - Fetches news categorized by topics for a curated news experience.
  - Offers a search feature for users to explore news based on their interests.
